

To open the bonnet:

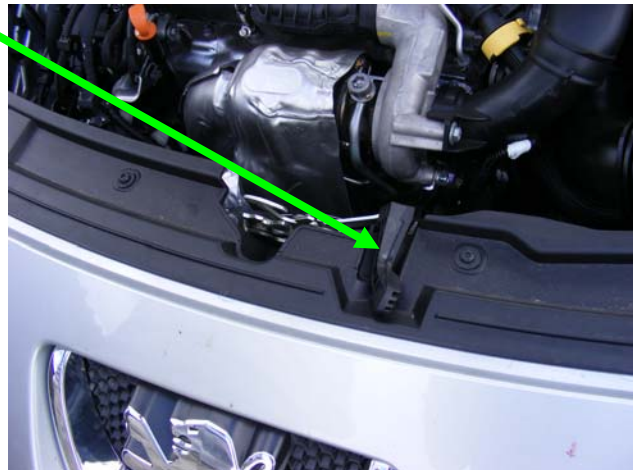

Pull up then release this lever in the passenger footwell

the door will need to be open

Lift the bonnet high enough with your left hand to insert a finger of your right hand just to the right of the centre-line of the bonnet and push the safety catch leftwards.

If the catch cannot be pushed left - lower the bonnet a little and try again, then lift the bonnet a little further to clear the catch, let go of the catch, and finally use both hands to raise the bonnet fully.

With your right hand, pull the bonnet stay up out of its clip.

Push the end of the bonnet stay into the slot of the bonnet stay locator, then gently let the weight of the bonnet down to lock it on the stay
