

The Brake Fluid level is checked visually through the translucent reservoir to ensure that the fluid level is between the 'max' and 'min' marks on the side of the reservoir. Fluid is added through the yellow screw cap.

'Show Me Tell Me' test requires pointing to the brake fluid reservoir and describing how to check that the fluid is at a safe level.

Q. Open the bonnet, identify where the brake fluid reservoir is and tell me how you would check that you have a safe level of hydraulic brake fluid.

A. Identify reservoir, tell how to check level.
